DETAILED FINAL ACTION

Response to Arguments

1. Applicant's arguments, filed 03/16/2005, with respect to claims 1, 3-5, 7-27 and 54 have been fully considered and are persuasive. The rejection of claims 1, 3-5, 7-27 and 54 have been withdrawn. Applicant cancels claims 2, 6 and 28-53, therefore the rejection of claims 2, 6 and 28-53 is moot.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-5, 7-14 and 54 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 and 54 of application #s: 10/614859, 10/614860, 10/614861, 10/614863, 10/614864. Although the conflicting claims are not identical, they are not patentably distinct from each other because applicant recites limitations that are based on the general premise of the instant application that each functional unit requires a minimum number of paths required to connect to associated

functional units, e.g., the number of paths is equivalent to the number of associated functional units needed to be connected to.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

3. Claims 15-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1, 3-5, 7-14 and 54 are allowable over the prior art.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, a storage system that comprises a plurality of channel units communicatively coupled to an upper-level system to enable bi-directional communication, a plurality of cache units communicatively coupled to said plurality of channel units; a disk device in which data sent from a control unit is stored, wherein a separate path exists between the channel unit and each cache as well as each cache unit to the control unit, i.e., there is no multiplexing in the communications but rather a dedicated path to the cache units and necessary logic to store data on the cache.

Information Disclosure Statement

5. The information disclosure statement filed 07/09/2003 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to

be listed. It has been placed in the application file 999, but the information referred to therein has not been considered.

U.S. Patent Documents have been considered, but Foreign Patent Documents and Other Documents have not.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
